

## THE PROJECT

Gift & Homewares Australia (GHA) is Australia's leading industry body representing the gift and homeware industry. With over 4,000 members, including importers, wholesalers, manufacturers, agents and retail business owners. GHA is also responsible for staging one of the largest trade fairs in Australia.

With the significant growth in attendances and increased interest from exhibitors at recent events, GHA came to UFS seeking a real solution to find a temporary structure that could accommodate their event needs.

The UFS solution was to provide a clear span structure engineered with significant height and rigging capabilities, integrated lighting, flooring, and effective heating options. The final state-of-the-art TFS solution delivered GHA with an additional 4000m<sup>2</sup> of exhibition space, and a facility comparable to any international permanent exhibition centre.

<b>Client</b>	Gift & Homewares Australia
<b>Location</b>	Melbourne, VIC, Australia
<b>Application</b>	Events
<b>Building Type</b>	Alu-Span TFS Series
<b>Size</b>	4000m <sup>2</sup>
