

THE PROJECT

Universal Fabric Structures (UFS) is proud to present the Mpowerdome, an 8 Court Tennis and Multisport Facility with a central mezzanine cafe and reception centre.

The project scope called for a state-of-the-art pre-engineered sporthall structure utilising our Alu-Span TFS technology and accessory items.

The unique design incorporated electric fans and a retractable curtain sidewalling system, allowing temperate airflow throughout warmer climates. Tensioned backdrop screens were integrated around the courts, and retractable divider nets were also utilised for multiple states of play.

The Mpowerdome Multisport Facility is the largest standard Tennis Sporthall of its kind in Australasia.

Client	Mpowerdome
Location	Canberra, ACT, Australia
Application	Sport & Recreation
Building Type	Alu-Span TFS Series Sporthall
Size	5900m ² (38m wide x 158m long)
Frame	Aluminium Anodized Box Beam
Fabric	Ferrari 702s PVC
Features	Retractable curtain walling system Electric fans Custom designed entrance Retractable divider nets
