

“The concept of the Rapid-Span is fantastic. These structures can protect our tennis players from the harsh Queensland summer sun and eliminate the impacts of wet weather - all in a relatively cost effective manner.”

Michael Blomer  
Facilities Development Manager  
Tennis Queensland

Weatherproof Fabric Structures... for Tennis

The Rapid-Span-R by Universal Fabric Structures is a practical, economic solution to year-round, all-weather tennis for coaches and clubs Australia wide. This easy-to-erect tensioned fabric structure comes in a one-court standard design that can be replicated for any number of courts.

Constructed using a lightweight structural steel frame covered with waterproof tensioned fire retardant fabric, the Rapid-Span-R can be installed on any existing tennis court surface and is fully relocatable.

The structure can be customised with various accessory options, including sliding sidewall curtains, doors, internal liners, ventilation, lighting, heating and cooling.

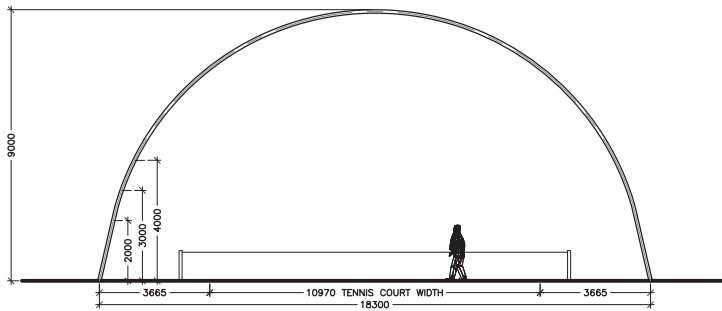

## Key Features

- Lightweight
- Economical
- Rapid install
- Fully relocatable
- 10+ year lifespan
- Waterproof
- Natural daylighting
- Low daytime operating costs
- Natural ventilation
- UV blocking
- Accessory options
- Modular design

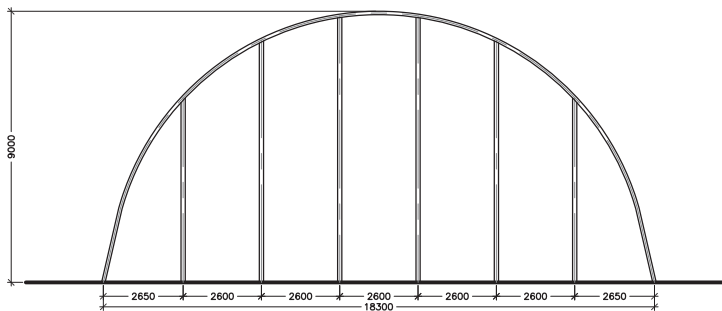

We've got your courts covered!
